

## ZION – ELY GUERRA, 2019

ZION, Ely Guerra's new studio album, is an overview of the nature of her voice, to her strength and her softness, her restlessness and her tranquility, her temperament and the essence of her behaviour. It is an invitation to undertake a personal journey through her many voices.

In this journey, you will discover the power of her voice as the unique instrument that utters phrases and modulates sounds, as Ely varies her singing, interruptedly and harmoniously, in frequencies, resonances, tonalities, colorations, crackles, echoes, tapping, ringing, bustles, hums, murmurs, and whistles making them coincide throughout her musical composition, thus delivering material of simple beauty, but complex at the same time. All you hear in Zion is her voice; in it, there is no other instrument but her voice.

The most personal musicality that Ely has exposed with her sung, spoken or written voice, is exposed in this unpublished material; a powerful new way of telling a story: her own, as well as the true, emotional and existential state the singer went through when she made it.

ZION - Live performance for concert.

Singer: Ely Guerra

Guest Music and Producer: Camilo Froideval

In this vocal concert, a single singer and a single musician explore an open field using analog and digital technology. Thereby reproducing the original sound of the work and creating new elements, all in real-time, immersing the spectator, not only in the unrepeatably handcrafted sounds created by the two performers, but also in one's own feelings to experience the music as the detonator of countless emotions.

Music is the most popular art; its rhythm, the pulse of the listener.
